Room ready in 1-2-3

Content :

Profiles and colours	4/5
Smartpanel Texture	6/7
Smartpanel Variation	8/9
Smartpanel Trend	10/11
Smartpanel Primed	12/13
Smartpanel Single	14/15

Smartpanel is not just stylish to look at, it is also surprisingly easy to install. The panels are installed directly onto the existing wall or studs. No sanding, plastering, preparation or painting is necessary. Best of all, you do not need to be a professional carpenter to install Smartpanel.

Smartpanel comes in several different profiles, colours and sizes, so there is a panel for every need. If you are still unable to find the colour you like, then you can choose a primed panel that is ready for you to paint in your favourite colour.

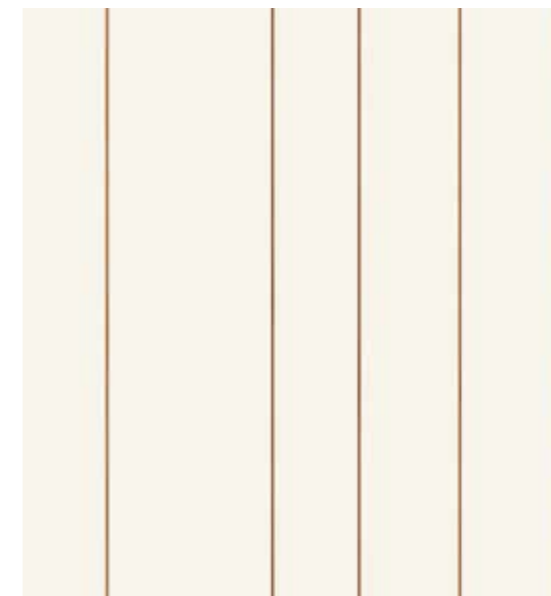

To complete the room we also supply ready painted ceiling panels and trim to match.

Smartpanel Single gives you a simple and stylish ceiling which is easy to install. The

Smartlist range is wide and includes both profiled and flat surfaces.

Try it out – you will be surprised how quick and simple it is to install and how beautiful the result is.

Profiles and colours

smart tip :

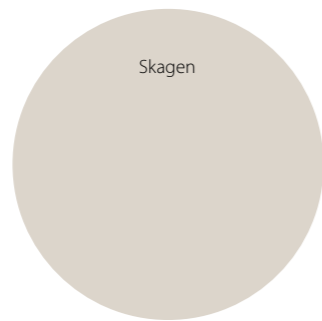

On our web site under Design Studio you can try out the various colours and profiles.

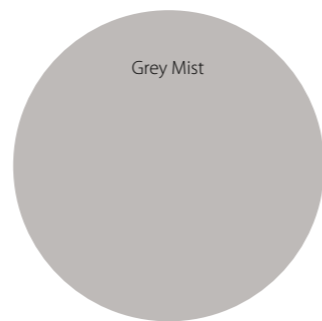

Smartpanel available colours :

New colour!

Pure Sand

New colour!

Mountain Grey

New colour!

Silver Grey

Smartpanel

With Smartpanel you can transform and create a new room in surprisingly short time. It does not get much simpler than this!

Smartpanel is a complete range of ready painted wall panels, ceiling panels and a selection of trim.

The standard products are based on the traditional panel profiles; shadow and pearl. We also supply a profile Variation with a deep cut groove. All these profiles, and the flat smooth board Trend, are supplied in delicate and modern light colours from Scandinavia.

With the combinations of colours, profiles and different surfaces the Smartpanel provides you with a large range of choices. A primed panel in all profiles are available if you wish to apply your own choice of paint.

What is MDF?

MDF boards are a further development of traditional wood fibreboards. All our Smartpanel products are made of planed profiles in MDF boards. MDF is short for Medium Density Board, which is a board of wood fibre that has been heat pressed after adding glue. MDF boards have great processing characteristics, which make it very suitable to work with, and therefore contribute to an environment friendly interior climate. MDF has several product advantages and is a popular product within the building industry and furniture industry. MDF boards are well suited for polishing and painting.

smartpanel®

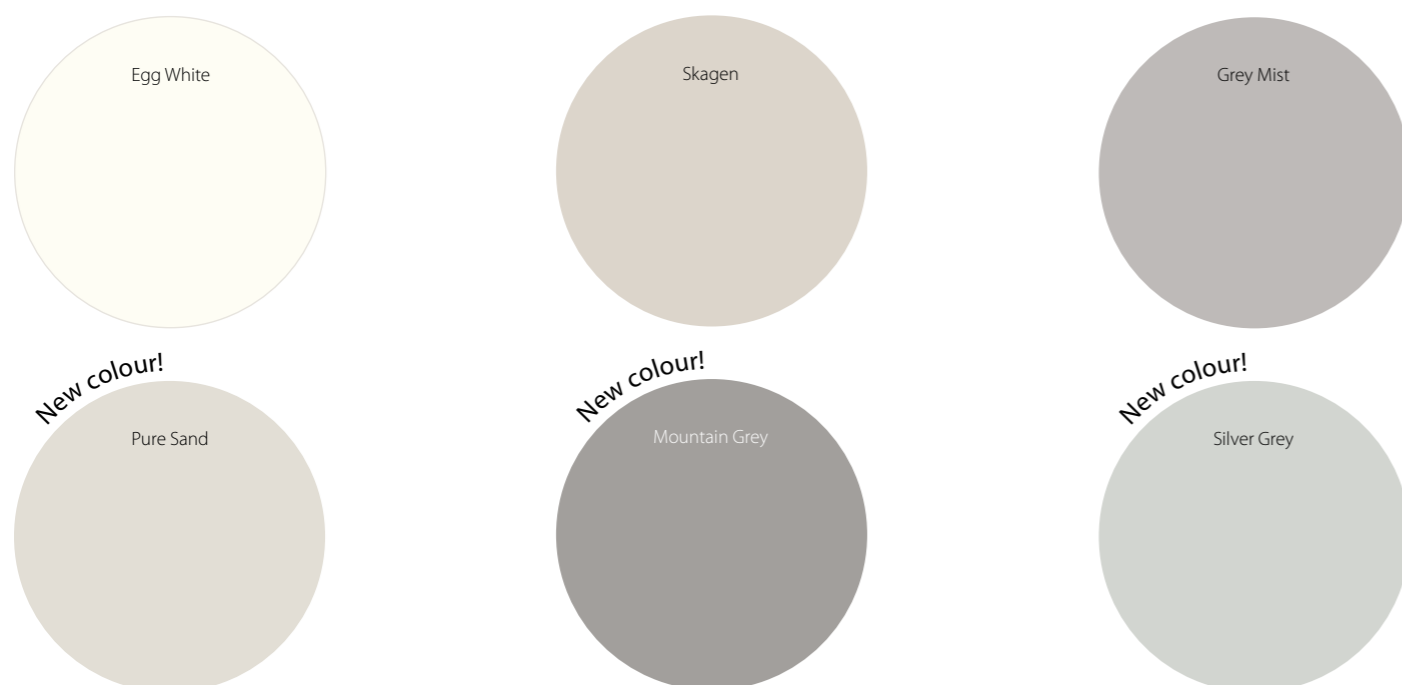

Smartpanel Texture

Texture is a beautiful panel with visible brush strokes which gives the panel a classic look. You can choose between 6 delicate colours; Egg White, Grey Mist, Skagen, Pure Sand, Mountain Grey and Silver Grey. All colours are available in both Pearl and Shadow profile. If you want a panel with an exclusive personal touch the Texture range is a very good choice and you will be able to enjoy this for many years to come.

smart tip :

Our ready painted panels are installed directly onto an existing wall or the studs in a new wall.

Texture available colours :

Variation

Egg White

Grey Mist

Smartpanel Variation

Variation represents an exciting and new type of wall panel. It is simple and stylish with a minimalistic touch. This is an alternative for you who want to create a modern room. The panels are cut straight with a deep shadow effect and there is an asymmetric distance between the shadow profiles. The grooves in the profiles are left in the natural MDF colour, which gives the panels an extra vibrant and modern look.

smart tip :

If you don't want Variation panels in the entire room you can create a feature wall with this panel to create an interesting and exciting look.

If the wall is narrow the Smartpanel Variation can be turned horizontally.

profiles and colours :

Smartpanel Variation

Measurements: 11x620x2390 mm

Colours: Egg White and Grey Mist

Board/Pallet: 1,48 m² / 99,28 m²

Boards per pallet: 67 pcs

Surface: Smooth

Trend

Smartpanel Trend - Smooth

Smartpanel Trend is a brand new panel series with a smooth surface. Trend has a unique click system, which makes the installation process extra easy with smooth tight joints. There are a variety of colours to choose from. These can be installed onto an existing wall or if a new wall, directly onto the stud work. No need for plaster boards, skimming and painting!

profiles and colours :

Smartpanel Trend

Measurements:	11x620x2390 mm
Flat/Smooth:	Whispering White , Pure Sand, Silver Grey, Mountain Grey
Board/pallet:	1,48 m ² / 99,28 m ²
Boards per pallet:	67 pcs
Surface:	Smooth
*Other colours available. Order minimum is one pallet.	

Delicate and creamy

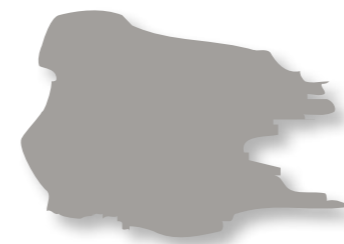

The colours are inspired by mountain and the sky during a grey autumn day and the sand and shells on the beach. These are modern colours you find around you daily and that gives a light Scandinavian interior look.

103753 Pure Sand

103750 Whispering White

103752 Mountain Grey

103751 Silver Grey

Unique click system:

Smartpanel Trend is very simple to install, the click system creates nice tight joints.

Primed panel

Smartpanel Primed for painting

This primed but unpainted panel is suitable for all types of room and does not shrink as standard wood panel. The Smartpanel will only need two coats of your favourite paint colour and you will create a very personal look. The tongue and groove system will make sure you get the professional finish you wanted.

Finishing up to you

We supply this unpainted version in Pearl, Shadow and Trend profiles. The tongue and groove system will make sure you get the professional finish you wanted. If you are using it in kitchens or bathrooms make sure you choose an appropriate paint with a high durability suitable in high humidity.

Fire Protection

This unpainted version can also be coated with fire protection paint as primer (two coats) before you apply the topcoat of your choice. This will make the Smartpanel suitable for a Class 0 and Class 1 fire rating under British Standard.

profiles :

Primed 11 mm

Pearl

Shadow

Trend - smooth

smart tip :

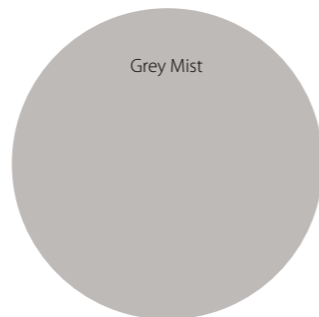

To get a good paint result on the boards, use a medium woollen roller and a waterborne silk paint.

Single Panel

smart tips :

The Smart Panel Single can be used both as a ceiling panel and a horizontal wall panel. This replaces the usual wood panel. However, you no longer need to think about grinding, spray painting, and shrinking. They can be installed either vertically or horizontally!

Single Panel for Ceiling & Wall

Smart Single Ceiling Board is a panel that gives you a stylish ceiling in no time.

This panel is suitable for new build as well as renovations.

The Ceiling panels are made of MDF material and are provided ready painted in Egg White or Misty Grey.
